# Resubmission

## Services

### MAXIMIZE REVENUE BY USING CURRENT REIMBURSEMENT PRICING AND RECOVERING LOST DOLLARS

Prescription drug prices change very frequently, which means pharmacies submitting claims must monitor price changes constantly. Failure to keep up with the most current pricing means lower reimbursements and reduced margins, yet monitoring these changes requires either additional resources or reassigning staff from more important tasks.

#### THE SOLUTION

AWP Resubmission Services help you to capture lost dollars for third-party transactions where the Average Wholesale Price (AWP) has increased on claims that were paid using an outdated AWP. With the Online Resubmission option, RelayHealth will reverse and resubmit those claims that you have selected as AWP opportunities online on your behalf, making it even easier to recover the difference.

#### AUTOMATICALLY MONITOR PRICING CHANGES

RelayHealth monitors when an AWP price change has occurred and a payer has paid using an old AWP. Once the payer has updated their pricing file, you receive a report that lists the opportunities where you can increase your reimbursement by reversing and resubmitting the claim.

#### EASILY REVIEW OPPORTUNITIES TO RECOVER LOST DOLLARS

With standard AWP Resubmission Services, you receive a report identifying when the payer used an outdated AWP for a submitted drug for which the payer has since updated their pricing. Using this report, you can review, reverse and resubmit the non-current AWP claims to recoup the additional revenue.
